<u>Property Owner:</u>	Marie Mancini
<u>Agent:</u>	N/A
<u>Existing FLUM:</u>	SFR (Single Family Residential)
<u>Requested FLUM:</u>	Comm (Commercial)
<u>Existing Zoning:</u>	R1M(Mixed Residential Subdivision)
<u>Requested Zoning:</u>	HCD(Highway Commercial Development)
<u>Zoning Board Recommendation:</u>	<i>Recommended Approval with a vote of 8 – 0</i>

STAFF ANALYSIS

Part I. General Information:

Applicant: Marie Mancini
Agent: N/A
Project Location: 3208 Hwy 87 S, Holley
Parcel Number: 05-2S-26-0000-02901-0000
Parcel Size: Total acreage requested = 0.49 (+/-) acres
Purpose: Resale

Requested Action(s): (1) Amendment of the Land Development Code Official Zoning Map changing the zoning district **from R1M to HCD**; and,
(2) Small scale amendment of the Comprehensive Plan Future Land Use Map changing the future land use designation **from Single Family Residential to Commercial**

Existing Zoning Description: R1M (Mixed Residential Subdivision District) allows detached single family residential structures, mobile homes, group homes and accessory structures and facilities. Maximum allowable density = 4 dwelling units (du) per acre.

Proposed Zoning Description: HCD (Highway Commercial Development District) allows a variety of commercial uses appropriate and easily accessible to major transportation corridors.

Automobiles and other vehicular service establishments, motels and hotels, funeral homes, business and professional offices, general retail and eating and drinking establishments, primarily characterize the HCD District. Additionally, this district is generally located adjacent to districts characterized by medium to high density residential development and areas of more intensive commercial use. Multiple family residential uses are allowed as a Conditional Use only upon determination by the Zoning Board.

Existing FLUM: Single Family Residential

Proposed FLUM: Commercial

Current Use of Land: The property is vacant.

Surrounding Zoning: The subject property has R1M (Mixed Residential Subdivision) on the north, and west R1 (Single Family Residential) to the south and HCD (Highway Commercial Development) to the east.

Part II. Data and Analysis (Consistency with the Santa Rosa County Comprehensive Plan):

A. Infrastructure Availability:

(1) Traffic:

Assuming all of the projected vehicle trips impact U.S. Highway 87S, the approximate 4.78 daily vehicle trips produced by the current zoning would increase by an additional 170 daily vehicle trips. Rated at LOS Standard “C” the current road capacity trips for U.S. Highway 90 thus indicates capacity for the proposed zoning is available. Specific traffic computations are provided as an appendix to this analysis.

(2) Potable Water:

Holley Navarre Water System

Maximum Capacity: 17.14 million gallons per day
Average Flow: 1.30 million gallons per day

A letter provided by Holley-Navarre Water System, Inc., indicates that water is available. The proposed amendment is not expected to create capacity problems for the Holley Navarre Water System.

(2) Sanitary Sewer:

The proposed amendment will be serviced by septic system.

(3) Solid Waste:

The applicant indicates a private hauler will be used to transport solid waste from the site. Currently the landfill has approximately 52% of the permitted airspace remaining. Based on estimated population projections, the remaining life of this airspace is approximately 30 years.

B. Compatibility:

The Land Development Code Articles and Comprehensive Plan Policies that apply with respect to the compatibility and/or suitability of the requested amendment are as follows:

Article 6.05.15.A states *“This district is designed to provide for a wide range of uses in appropriate and easily accessible locations adjacent to major transportation corridors and having access to a wide market area. This district is intended to be situated along selected segments of major thoroughfares in the vicinity of major intersections.”*

Policy 5.1.C.8 of the Comprehensive Plan states:

“the County shall continue to utilize the Future Land Use Map amendment, rezoning, conditional use and special exception approval process to assure that new proposed land uses are compatible with existing residential uses, and will not significantly contribute to the degradation of residential neighborhoods.”

The majority of surrounding property north, south and west is vacant with public owned property to the east.

C. Suitability:

Policy 3.1.E.6 of the Comprehensive Plan states:

“the County shall use the latest version of the Flood Damage Prevention Ordinance promulgated by the FEMA to determine the location of the 100-year floodplain and flood prone areas and development shall be limited in those areas, consistent with FEMA requirements.”

Flood zone maps show this area is not in a flood zone.

Policy 3.1.A.2 of the Comprehensive Plan states:

“the maximum densities and intensities permitted on a given parcel of land shall be based upon the suitability of topography and soil types for septic drainfield systems, potable water wells, and ability to physically support buildings and improvements, as determined by the Santa Rosa County Soils Map, the Department of Health, DEP, COE, and appropriate engineering manuals, in the review of proposed development projects.”

The National Wetlands Inventory Map indicates there are no possible wetlands on this site.

D. Urban Sprawl

Policy 3.1.G.4 of the Comprehensive Plan states:

“no future land use category may be changed and no rezoning may be approved unless a finding is made that the change in land use or land use classification or zoning category will promote compact development and discourage urban sprawl. The Santa Rosa County Board of County Commissioners shall be responsible for making such finding upon receipt of a report from the LPA.”

The proposed development of the property and a rezoning to HCD (Highway Commercial Development) would not result in a finding of urban sprawl under the proposed classification.

For the R1M estimation:

Single Family Detached Housing (210)

0.49 Acres x 4du's/acre = 1 possible units

ITE Average Rate: $9.57 \times 1 = 9.57$ Average Daily Vehicle Trips

Driveway % $0.50 \times 9.57 = 4.785$ Daily Vehicle Trips

New Trip % = 100%; $4.785 \times 1.00 = 4.785$ New Daily Vehicle Trips

Selection of the ITE data plot (21) for single family detached housing was made because this was the worst case scenario or the maximum allowable level of development intensity within the zoning district. The independent variable (Dwelling Units) was chosen in accordance with professionally accepted practices: there was a coefficient of determination of 0.96 for this data plot; the standard deviation was 3.69 for this data plot; and there was a large sample size (350 studies).

For the HCD estimation:

Specialty Retail Center (814)

The applicant provided information as to the type of development proposed. However, in case of rezonings it is more acceptable to present a worst case scenario analysis as development plans are not finalized and due to the overall permanence of the situation. Therefore, a possible building size was determined and applied as the independent variable in order to produce a more general trip generation rate. Building square footage is generally selected as the independent variable for commercial and industrial developments.

Given:

Land Size = 0.49 acres or 21,344.0 sq. ft.

Site Plan Requirements – 15% pervious cover required

Parking Requirements = Specialty Retail; 1 space per 250 sq. ft. of gross area (4 spaces/1,000 sq. ft.);

Parking/Driveway/Aisle Estimation = 325 sq. ft. per space

Wetland area = 0

Buildable area = building pad + parking lot

$y =$ sq. ft. gross floor area of building pad in thousands

$21,344 \times 0.85 = 1,000y + (y \times 4 \times 325)$

$18,142.4 = 1,000y + 1,300y$

$18,142.4 = 2,300y$

$y = 7.888$

Building size = $7.888 \times 1,000$ square feet = 7,888.0 square feet gross floor area

ITE Average Rate: $44.32 \times 7.888 = 349.60$ Average Daily Vehicle Trips

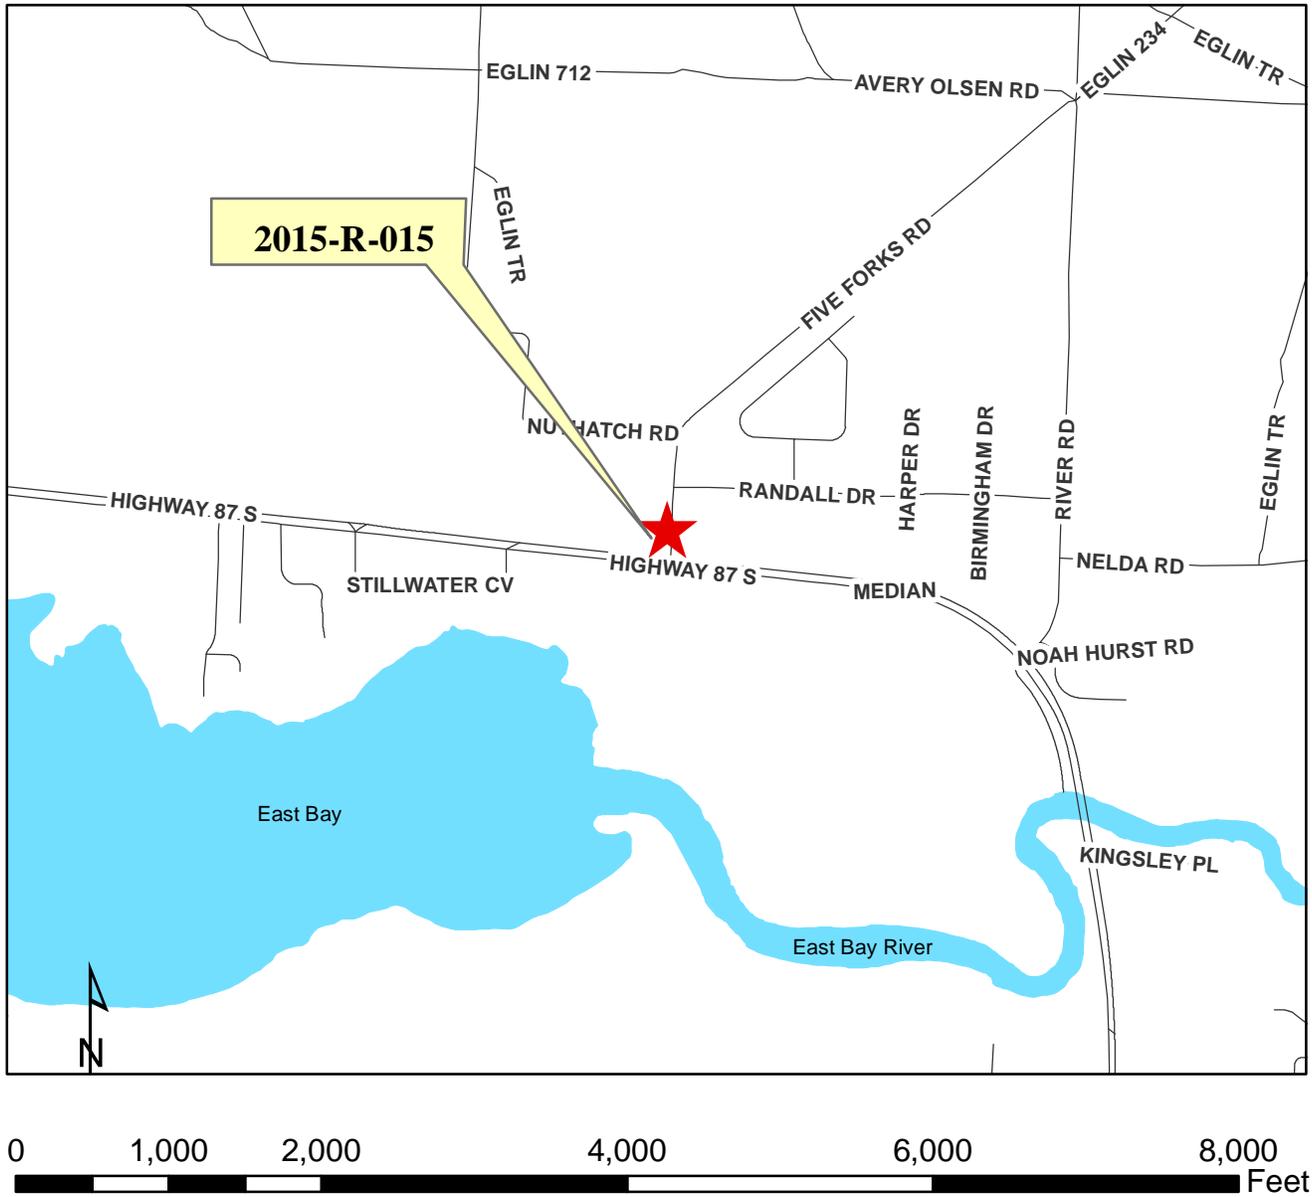

Driveway % $0.50 \times 349.6 = 174.8$ Daily Vehicle Trips

New Trip % = 100%; $174.8 \times 1.00 = 174.8$ New Daily Vehicle Trips

Selection of the ITE data plot (814) for specialty retail center was made because it is more acceptable to present a worst case scenario analysis as development plans are not finalized and due to the overall permanence of the situation. The independent variable (1,000 sq. ft. Gross Floor Area) was chosen for reasons described above and in accordance with professionally accepted practices: there was a coefficient

of determination of 0.69 for this data plot; the standard deviation was 15.52; and there was a small sample size (4 studies)

Subject: Rezoning Application 2015-R-015 for Marie Mancini

Hi Darlene,

We received a notice regarding a rezoning application for parcel number 05-2S-26-0000-02901-0000, and understand the Zoning Board meeting is this evening.

We are sending this email to let the Board know that we support the rezoning. Please let us know if you have any questions.

Thank you,

Donna Ansell
