Requested Zoning:	AG2, Agriculture
Existing FLU:	AG, Agriculture
Requested FLU:	<i>No change to FLU</i>
Zoning Board Recommendation:	<i>Recommended approval without objection</i>

Rezoning 2016-R-004

Part I. General Information:

Project/Applicant: Richard Williams
Representative: n/a
Location: 2800 block of Wallace Lake Road, Pace, FL
Parcel(s): 13-2N-30-0000-00198-0000
Existing Zone: R1 (Single Family Residential)
Proposed Zone: AG2 (Agriculture)
Current FLU: AG (Agriculture)
Proposed Change to FLU: **No change to FLUM**
Area Size: (+/-) 42.27 acres
District: Commissioner District #3
Current Conditions: Vacant land
Proposed use: Crop land and planted pines

Requested Action(s): Amendment of the Land Development Code Official Zoning Map changing the zoning district **from R1 to AG2.**

Staff Recommended Action(s):

Zoning Board Recommendation: ***Recommended approval without objection***

Existing Zoning Description: R1 (Single Family Residential) is intended for low density residential development and is characterized by single-family detached dwellings and applicable accessory structures. Group homes are permissible. Mobile homes are prohibited.

Proposed Zoning Description: AG2 (Agriculture) is intended for agriculture and silviculture endeavors and is characterized by relatively larger parcels of land devoted to the production of food and fiber. The district may include single family detached dwellings. It is the intent of the district to exclude all buildings having commercial characteristics.

Surrounding Zoning: The subject property is surrounded by AG-RR (Rural Residential

Agriculture) and R1 (Single Family Residential) parcels. The surrounding properties are a mixture of single family residences and silviculture uses.

Rezoning History:

Records indicate that in 2007 this parcel was part of a larger 138-acre tract and was rezoned from AG to R1 per 2007-R-064 as part of the workforce housing density bonus program. The BOCC approved this request with the condition the development be on sewer unless the lots were at least 1-acre in size.

Previously, rezoning 2004-R-015 was requested to change the district from AG to R1; this request was denied.

Part II. Data and Analysis: (Consistency with the Santa Rosa County Comprehensive Plan)

A. Infrastructure Availability:

The requested rezoning is not expected to create infrastructure capacity problems for water, sewer, traffic, and solid waste.

B. Compatibility:

The Land Development Code Articles and Comprehensive Plan Policies that apply with respect to the compatibility and/or suitability of the requested amendment are as follows:

Article 6.05.02.A states:

“This district is designed to provide suitable areas for agricultural and silviculture endeavors. This district will be characterized by relatively large parcels of land being devoted to the production of food or fiber. This district also may include single family detached structures and, as specifically provided for in these regulations conditional uses for community facilities and utilities which service specifically the residents of this district, or which are benefited by and compatible with the agricultural activities extant within the district and the farming environment. Such facilities should be accessibly located and appropriately situated in order to satisfy special requirements of the respective community facilities while protecting the agricultural productivity of the surrounding lands.

It is the express purpose of this section to exclude from this district all buildings or other structures and uses having commercial characteristics whether operated for profit or otherwise, except those home occupations and conditional uses specifically provided for in this ordinance and the commercial activities associated with the farming environment.”

Policy 5.1.C.8 of the Comprehensive Plan states:

“the County shall continue to utilize the Future Land Use Map amendment, rezoning,

conditional use and special exception approval process to assure that new proposed land uses are compatible with existing residential uses, and will not significantly contribute to the degradation of residential neighborhoods.”

The surrounding area is a mixture of single family residences on lots ranging in size from 1-acre to 20 acres and greater.

C. Suitability:

Policy 3.1.E.6 of the Comprehensive Plan states:

“the County shall use the latest version of the Flood Damage Prevention Ordinance promulgated by the FEMA to determine the location of the 100-year floodplain and flood prone areas and development shall be limited in those areas, consistent with FEMA requirements.”

Flood zone maps show this area is partially located within an “X” flood zone which means an area determined to be outside 500- year flood plain. The request is thus consistent with this policy.

Policy 3.1.A.2 of the Comprehensive Plan states:

“the maximum densities and intensities permitted on a given parcel of land shall be based upon the suitability of topography and soil types for septic drainfield systems, potable water wells, and ability to physically support buildings and improvements, as determined by the Santa Rosa County Soils Map, the Department of Health, DEP, COE, and appropriate engineering manuals, in the review of proposed development projects.”

The National Wetlands Inventory Map indicates there are no wetlands on this site.

D. Urban Sprawl

Policy 3.1.G.4 of the Comprehensive Plan states:

“no future land use category may be changed and no rezoning may be approved unless a finding is made that the change in land use or land use classification or zoning category will promote compact development and discourage urban sprawl. The Santa Rosa County Board of County Commissioners shall be responsible for making such finding upon receipt of a report from the LPA.”

The proposed zoning would not result in a finding of urban sprawl under the proposed classification.

Appendix

For the R1 estimation:

Single Family Detached Housing (210)

169 possible units (per Comprehensive Plan)

ITE Average Rate: $9.57 \times 169 = 1617.33$ Average Daily Vehicle Trips

Driveway % $0.50 \times 6842.55 = 808.67$ Daily Vehicle Trips

New Trip % = 100%; $3421.28 \times 1.00 = 808.67$ New Daily Vehicle Trips

Selection of the ITE data plot (210) for single family detached housing was made because this was the worst case scenario or the maximum allowable level of development intensity within the zoning district. The independent variable (Dwelling Units) was chosen in accordance with professionally accepted practices: there was a coefficient of determination of 0.96 for this data plot; the standard deviation was 3.69 for this data plot; and there was a large sample size (350 studies).

For the AG2 estimation:

Single Family Detached Housing (210)

2 possible units (per self-imposed development maximum)

ITE Average Rate: $9.57 \times 2 = 19.14$ Average Daily Vehicle Trips

Driveway % $0.50 \times 19.14 = 9.57$ Daily Vehicle Trips

New Trip % = 100%; $9.57 \times 1.00 = 9.57$ New Daily Vehicle Trips

Selection of the ITE data plot (210) for single family detached housing was made because this was the worst case scenario or the maximum allowable level of development intensity within the zoning district. The independent variable (Dwelling Units) was chosen in accordance with professionally accepted practices: there was a coefficient of determination of 0.96 for this data plot; the standard deviation was 3.69 for this data plot; and there was a large sample size (350 studies).

NOTE:
 THE SURVEY SHOWN HEREON WAS PREPARED FOR THE EXCLUSIVE USE AND BENEFIT OF THE PARTIES LISTED HEREON. LIABILITY TO THIRD PARTIES MAY NOT BE TRANSFERRED OR ASSIGNED.

FLOOD STATEMENT:
 This is to certify that I have consulted the available Federal Insurance Administration Flood Hazard Map, Map numbers 121130 0280 G, dated 12/19/06 and it is my opinion that the parcel described hereon is in flood zone "X" areas determined to be outside the 0.2% annual chance floodplain and flood zone "A" base flood elevations not determined.
