

2016-R-005

Project Name:	n/a
Applicant and/or Property Owner:	Principle Properties Inc., Ruth Esser
Agent:	n/a
Existing Zoning:	AG-RR (Rural Residential Agriculture)
Requested Zoning:	M1 (Restricted Industrial)
Existing FLU:	AG (Agriculture)
Requested FLU:	INDUS (Industrial)

Rezoning 2016-R-005

Part I. General Information:

Project/Applicant: Principle Properties Inc., Ruth Esser
Representative: n/a
Location: In the 4100 block of Ward Basin Road, Milton, FL
Parcel(s): 19-1N-27-0000-00800-0000
Existing Zone: AG-RR (Rural Residential Agriculture)
Proposed Zone: M1 (Restricted Industrial)
Current FLU: AG (Agriculture)
Proposed Change to FLU: INDUS (Industrial)
Area Size: (+/-) 3.4 acres
District: Commissioner District #2
Current Conditions: Vacant land
Proposed use: Utility contractor construction office and storage yard

Requested Action(s):

1. Amendment of the Land Development Code Official Zoning Map changing the zoning district **from AG-RR to M1.**
2. Small scale amendment of the Comprehensive Plan Future Land Use Map changing the future land use designation **from AG to INDUS**

Information added after the Zoning Board meeting is shown in double underline format.

Existing Zoning Description: AG-RR (Rural Residential Agriculture District) allows detached single family residential structures and mobile homes. Accessory structures and facilities and uses customarily found on farms and used expressly for activities conducted in connection with farming operations, commercial and non-commercial agriculture, poultry, horse and livestock raising, provided all buildings for such accessory uses meet setback requirements for primary buildings.

Proposed Zoning Description: M1 (Agriculture) is intended for limited range industrial uses such as general assembly, warehousing, and distribution activities. The activity within this district is primarily within an enclosed building. Residential development is excluded from

this district. All activities should conform to a high level of Performance Standards.

Existing FLUM: AG (Agriculture)

Proposed FLUM: INDUS (Industrial)

Surrounding Zoning: The subject property is surrounded by AG-RR (Rural Residential Agriculture) and R2M (Medium Density Mixed Residential) parcels. The surrounding properties are a mixture of vacant land and single family residences.

Rezoning History: There is no rezoning history for this property.

Part II. Data and Analysis: (Consistency with the Santa Rosa County Comprehensive Plan)

A. Infrastructure Availability:

The requested rezoning is not expected to create infrastructure capacity problems for water, sewer, traffic, and solid waste.

(1) Predicted Maximum Roadway Impact:

Ward Basin Road is currently rated at a Level of Service (LOS) "B" with an Average Daily Traffic (AADT) of 3,600. Rated at LOS Standard "C", the maximum available capacity of 17,300 trips for Ward Basin Road thus indicates capacity is available for the proposed zoning.

(2) Potable Water:

A letter provided by the applicant from East Milton Water System, Inc. indicates water service is available to the site. The proposed amendment is not expected to create capacity problems for the East Milton Water System, Inc.

(3) Sanitary Sewer:

A letter provided by the applicant from City of Milton indicates that sewer service is currently available to the site.

(4) Solid Waste:

The applicant has not indicated the means by which solid waste will be disposed from the site. It is anticipated that either a private hauler will be used to transport solid waste from the site or the applicant will dispose of solid waste material directly to the landfill. Currently the landfill has approximately 52% of the permitted airspace remaining. Based on estimated population projections, the remaining life of this airspace is approximately 30 years.

(5) Parks, Recreation and Open Space:

A rezoning to M1 with a future land use amendment to Industrial would not increase demand on recreation facilities.

B. Compatibility:

The Land Development Code Articles and Comprehensive Plan Policies that apply with respect to the compatibility and/or suitability of the requested amendment are as follows:

Article 6.05.19.A states:

“This district is designed to accommodate a limited range of industrial and related uses which conform to a high level of Performance Standards. Industrial activity of this type is intended to be carried out within completely enclosed buildings where ever practical, and outdoor storage must be visually screened from adjacent residential areas. The uses which this district is designed to accommodate include general assembly, warehousing and distribution activities. In addition, major repair and service activities, as well as limited impact manufacturing activities meeting Performance Standards are intended to be accommodated in this district. Finally, commercial trade and service activities not compatible with activities adaptive to more restrictive districts, but which satisfy site plan criteria and performance criteria of the "M-1" district, should be accommodated in the "M-1" district. Residential development is excluded from this district, both to protect residences from an undesirable environment and to ensure the preservation of adequate areas for industrial development. Community facilities and trade establishments which provide needed services to industrial development also are intended to be accommodated in this district. Refer to Section 6.03.04.”

Policy 5.1.C.8 of the Comprehensive Plan states:

“the County shall continue to utilize the Future Land Use Map amendment, rezoning, conditional use and special exception approval process to assure that new proposed land uses are compatible with existing residential uses, and will not significantly contribute to the degradation of residential neighborhoods.”

The property appraiser’s assessment of the existing land use in the vicinity of the subject property indicates a variety of commercial, vacant, and single family residences. The immediately surrounding area is single family residences on lots ranging in size from 0.34-acre to 5 acres and greater. Industrial uses would not be compatible with the existing uses within the vicinity.

There are approximately 2,200 acres of vacant land already zoned Industrial in the East Milton area.

C. Suitability:

Policy 3.1.E.6 of the Comprehensive Plan states:

“the County shall use the latest version of the Flood Damage Prevention Ordinance promulgated by the FEMA to determine the location of the 100-year floodplain and flood prone areas and development shall be limited in those areas, consistent with FEMA requirements.”

Flood zone maps show this area is partially located within an “X” flood zone which means an area determined to be outside 500- year flood plain. The request is thus consistent with this policy.

Policy 3.1.A.2 of the Comprehensive Plan states:

“the maximum densities and intensities permitted on a given parcel of land shall be based upon the suitability of topography and soil types for septic drainfield systems, potable water wells, and ability to physically support buildings and improvements, as determined by the Santa Rosa County Soils Map, the Department of Health, DEP, COE, and appropriate engineering manuals, in the review of proposed development projects.”

Although the National Wetlands Inventory Map indicates there are no wetlands on this site, the hydric soils within the site indicate the possibility of wetlands.

D. Urban Sprawl

Policy 3.1.G.4 of the Comprehensive Plan states:

“no future land use category may be changed and no rezoning may be approved unless a finding is made that the change in land use or land use classification or zoning category will promote compact development and discourage urban sprawl. The Santa Rosa County Board of County Commissioners shall be responsible for making such finding upon receipt of a report from the LPA.”

The proposed zoning would not result in a finding of urban sprawl under the proposed classification.

RE: Pre-Application Meeting on January 27, 2016
Project Name: **Principle Properties Inc.**
Parcel(s): 191N270000008000000

Dear Ms. Esser:

Thank you for attending the above referenced pre-application meeting with the Santa Rosa County Development Services staff. Below you will find a recap of the information discussed at the meeting and the requirements for you to proceed with the project.

The purpose of a pre-application meeting is to provide you with a thorough understanding of the regulations and requirements applicable to your proposed project and to address any questions that you may have. However, pre-application meetings are informal and do not replace the need for a formal review. Therefore, please understand that the requirements presented below are based solely on the information presented by you at the meeting and is subject to change. Also, additional requirements may be applicable to your project based on information received at a later date or at the time of formal review.

Proposed Use - The proposed project is a new 4,700 square foot office and shop building for a construction company that leases out dump truck services for local projects.

Site/Land Use – Jason McLarty, (850) 981-7065, jasonm@santarosa.fl.gov

1. Zoning Map designation: AG-RR
Future Land Use Map designation: AG
The proposed use is not allowed in this district. You may request a rezoning to **M1** which would allow the proposed use. Rezoning requests are approved by the Zoning Board and Board of County Commissioners. An application for rezoning was provided at the meeting along with instructions to meet the deadline for the March meeting agendas.
2. A site plan prepared by a Florida registered civil engineer is required to demonstrate consistency of the project with the Land Development Code. A site plan application can be found online at

Santa Rosa County Public Service Complex

Office: (850) 981-7000

<http://www.santarosa.fl.gov/developmentservices/documents/Site%20Plan%20Editable.pdf>.

The primary Land Development Code (LDC) sections that apply to this project will be 4.04.00 - 4.04.10; 6.05.19, and 7.00.00 - 7.01.12.

3. M1 Zone Performance Standards:
 - a. All outdoor storage shall be effectively screened by a solid wall; fence or planting so that such stored materials will not be visible from a public way or residential area.
 - b. All activity within 200 feet of a residential district boundary shall be conducted within completely enclosed buildings.
4. Setbacks: Building setbacks for this site are: Front = 50 feet, rear = 50 feet, and sides = 50 feet.
5. Architectural Style: In the meeting it was discussed that a metal façade would not be allowed facing Ward Basin Road. That requirement was under the premises that you were going to need to rezone to HCD, however, since a rezone to M1 is going to be required, the metal façade regulation will not apply.
6. Tree protection: A tree survey, tree protection, and mitigation for tree removal is required per LDC Section 7.01.06.
7. Buffers: Landscape buffers are required per LDC 7.01.05. For this use, the minimum buffer requirements will be buffer zones "D" or "E".
8. Landscaping: Right-of-way and parking area landscaping is required per LDC Sections 7.01.03 and 7.01.04.
9. Access Management: This property is on a Major Collector road and must meet the driveway and interconnectivity requirements of LDC Section 4.04.02.D. Only a single 2-way access point will be allowed from Ward Basin Road.
10. Off-Street Parking and Loading: Parking and loading areas must meet the requirements of LDC Section 7.01.08. For parking calculations, the proposed use will be categorized as a Manufacturing Warehouse or Similar Activity. Although standard parking spaces must be 18 feet in length and 9 feet in width, we have noticed that spaces 20 feet in length and 10 feet in width work well within our community.
11. Signage: Freestanding and wall signage is permitted per LDC Article 8.
12. Water and Sewer: Letters of water and sewer service availability are required. Your project is located in the following service areas.
 - A. Water - East Milton Water System, Dink Helms; 623-8750.
 - B. Sewer - No Sewer Franchise Available

Engineering – Chris Phillips, (850)981-7100, chrisp@santarosa.fl.gov

1. No turn lane required.
2. Due to high groundwater table in the area, a wet detention pond may be likely.
3. There is a fire hydrant located across Ward Basin Road.

Building – Bruce Teston, (850)981-7017, brucet@santarosa.fl.gov

1. Plans must be provided for construction details for wind speed compliance for 150. Must also provide ADA compliance for restroom and accessible route from ADA parking to

building entrance. Interior wall construction details, including wall finish, ceiling height and finish and exit access from all areas of the building. Plans must be prepared by a licensed design professional.

Review Process:

1. Site plans and construction plans are reviewed and comments are issued within 10 days.
2. A Development Order is (DO) issued upon approval of a site plan. Building permits are issued upon approval of construction plans.
3. Concurrent review of site and construction plans is allowed; however, building permits may not be issued before issuance of the DO.
4. Site work may not commence prior to the issuance of the DO; construction may not commence prior to issuance of building permits.

In closing, our hope is that you found the pre-application meeting to be a helpful tool so that you can make informed decisions about your project. As the County's project manager for your project, please feel free to contact me with any questions that you may have. In addition, you may contact the staff listed above if you have questions specific to their area of expertise. Also, I will be in contact with you periodically to assess the status of your project and provide assistance.

Respectfully,
Tambre L. Lee

Received DURING the
Zoning Board meeting

April 13, 2016

RE: Rezoning Application 2016-R-005 for Ruth Esser of Principle Properties Inc.

Dear Leslie Statler and Santa Rosa County Development Services,

We are unable to be at the said hearing as I am active duty military currently stationed in Texas, so please remit this written request for presentation to the Board and my behalf. We have a vested interest in this because we are being reassigned this summer and moving back into our house.

As the application 2016-R-005 has been filed to rezone parcell 19-1N-27-0000-00800-0000 from AG-RR to M1, as a rural residential property owner within less than 500 ft of said property, and as our property 4124 Ward Basin Road directly abuts to said property with our backyard facing it, we must object to the rezoning of this property for commercial uses. We were not expecting to move back into a commercial area. We thought it would still be our home in a piece of country.

When we first bought our property in 1997, one of the most appealing attractions and reasons that we bought there is because it and the surrounding property was zone AG-RR. The lot that is in question of being rezoned is a long leaf pine forest that has provided a tranquil peace for our family and has provided privacy for our backyard. As we are on the corner of Ward Basin Rd and Beasley Rd, and as there is one other residence on Beasley at the time, we had no choice but position our home in its current state to have some privacy, and so we did this. We did anticipate someone may one day put a house there, but never thought we would have to contend with a construction commercial company and trucks and heavy equipment.

If this property is allowed to be rezoned especially for a construction company, we are afraid it will become extremely noisy and will invite unwanted intruders into our backyard as well as allow potential crime that would allow intruders to scope out our backyard from this vantage point and target our property. We also fear kids hanging out in the parking lot in the evenings.

If we wanted to live among businesses with construction company trucks coming and going, we would have moved into town, but we liked the country setting and the fact that the surrounding properties were all agricultural/rural residential.

If this parcel is allowed to be rezoned, we will feel betrayed and misled by the county. We, as well as our neighbors, bought our properties based on what the county had zoned it for originally. To change it on us now would be a betrayal. Just because someone wants to pay to rezone for their benefit, we ask that you consider all those of us living around the property who have owned it for years as residential. This would also significantly lower our property values. The values are already much lower than they used to be. Please do not let them take away our bit of country feeling and our way of life with our families.

Sincerely,

Marshall E. Kenney and Michele Kenney

Leslie Statler

Thank you for asking for my input on the rezoning. I own the property at 4096 Driskell Road because it is quiet. The most appealing thing about Santa Rosa County is the natural resources. From the end of Driskell Road at Ward Basin Road one can see the water at the other end of the short road. From my front yard all I hear is the sound of birds, crickets, and the occasional dog. I have grandchildren growing up on Driskell Road. The Pittmans on the corner of Ward Basin and Driskell have two small children. We don't need industrial zoning. We already have Northwest Florida Industrial Park, Jay Industrial Park, Santa Rosa Industrial Park, and Pace Industrial Area. Just say no.

Thank you,

Jonathan Norris
