

About our Contractors

PBS&J

PBS&J is a consulting engineering firm with core services that encompass engineering, planning, construction management, program management, scientific disciplines, surveying and mapping, architecture, landscape architecture, and information technologies. Their clients represent a mix of both the public and private sectors and include counties and municipalities, state departments of transportation, development companies, airports, power utilities, toll road agencies, and contractors.

Founded in 1960, PBS&J has become one of the leading multidisciplinary engineering firms in Florida and is ranked by Engineering News-Record as 30th among the nation's top consulting firms. PBS&J has 3,800 employees and 80 offices nationwide.

Ed Waters & Sons Contracting Co., Inc.

Ed Waters & Sons Contracting Co., Inc. is a general contracting firm specializing in pile foundations, steel sheet pile structures and marine construction. Their primary range of operations covers Florida, Georgia and South Carolina.

Their construction experience consists of the successful completion of a number of diverse projects such as steel sheet pile bulkheads and wharves (both straight wall and cellular construction), concrete sheet pile bulkheads, subaqueous outfall structures, bridges, fender systems, dolphins and various repairs to all types of waterfront structures. They have also installed driven pile foundations utilizing a variety of materials and temporary steel sheet pile cofferdams. Their work has allowed us to gain experience in a variety of site conditions ranging from oceanfront to marsh to industrial settings to waterways and more. Their client list includes agencies of federal, state and local governments, industry and commercial interests.
