

RESTORE Act Projects

Eufala Outfall Treatment

Project Description

This project involves the installation of an outfall treatment system on the outfall of an existing City of Gulf Breeze stormwater conveyance system. This will provide for water treatment and erosion control for Eufala Street, including hardening and protecting the discharge point for the existing Gilmore stormwater lift station.

This will provide treatment for water discharged into the Pensacola Bay and improve water quality for both residents and tourists to the area.

RESTORE Direct Component Funding Request

\$373,895

City of Gulf Breeze Contribution

\$373,895

Total Project Cost: \$747, 790
