To: Santa Rosa County Board of County Commissioners
From: Brad Baker, Director, Emergency Management
Through: Tony Gomillion, County Administrator
Re: EOC Generator Replacement
Date: September 8, 2016

RECOMMENDATION

Recommend that the Board of County Commissioners approve purchase of a 200 KW whole building generator utilizing 911 funds from Bill Smith Electric, Inc. at a cost of \$167,989 for the EOC Building as the low bidder.

BACKGROUND

The current 500 KW main generator is designed to run the entire building. The back-up generator is a 50 KW and designed to run only essential items in the 911 center and some lighting. Installed in 1997, maintenance costs for the whole building generator have become prohibitive.

The cost to replace the generator is an allowable expense under 911 funding. Current fund balance is 1.1 million dollars. The price will include installation of the new generator as primary and convert the current system as a backup. Pricing does not include weather shelter for the equipment as it would be more cost effective to complete in house.

Two (2) quotes were received in response to an RFP issued by Procurement. The bid forms are attached and, if approved, will be awarded to the lowest bidder.

COMPLETION

This purchase will be managed through the Emergency Management Office.
