Planning Board to Discuss Wind Turbine Requirements, Public Input Needed

The Santa Rosa County Local Planning Board will discuss a proposed ordinance incorporating small wind energy systems into the county's land development code on Thursday, February 11 at 6 p.m. in the board meeting room located at 6495 Caroline Street, Milton. A small wind energy system, or wind turbine, is a wind energy conversion unit designed to supplement traditional electric power for a home or business. The public is encouraged to attend to comment and make recommendations to the planning board.

The addition of wind turbines into the land development code will be discussed during the regularly scheduled local planning board meeting. The discussion is expected to include height limitations, placement on land parcels, safety issues, and compatibility with surrounding structures and area usage. For more information or to offer suggestions, please contact Paul Miller at (850) 981-7078 or paulm@santarosa.fl.gov.
